

# Bart Spices Add Seaweed to its Organic Range

**B**art Spices, the Bristol based herb, spice and seasonings company has launched two new organic products using a practical refillable mill format.

Organic Black Peppercorn Mill and Soil Association Certified Sea Salt and Seaweed Mills.

When using spices, the best flavour and aroma is used when products are freshly ground on each usage occasion. The new Bart mills ensure this time after time.

Using only the best black peppercorns from India, the refillable mill can be used during cooking or as a condiment. The Sea Salt and Seaweed Mill contains *Pelvetia Canaliculata* which is harvested in the remote Lofoten Islands off the Norwegian Coast. The seaweed enhances the salt with a subtle nutty, vegetable flavour so making it a great cooking ingredient as well as a good way to flavour any dish.

These products have been well received with both products winning gold awards in the 'Taste of the West Food Awards' earlier this year.

Refill packs are also available.
