

## Seagreens Food Capsules

Seagreens® (advertisement p. 14) turns wild organic quality seaweed into food products which help maintain our balance of natural micronutrients (minerals, vitamins, trace elements and so on). The business was set up by Simon Ranger of The Warren, Handcross, 10 years ago as much to develop his own 'brand' of commercial enterprise as to explore seaweed for human health.

"If we are to humanise business we must make room in business for the whole human being" he believes. The spiritual dimension is unwelcome in business, but this causes an unhealthy imbalance in its overall product - as the present economic climate demonstrates. Business is about wealth creation, but in my view, wealth is misleading unless informed by the richness of the spirit.

(Eph. 2:5-10; Col. 1:27).
